Market Update

Economy Review

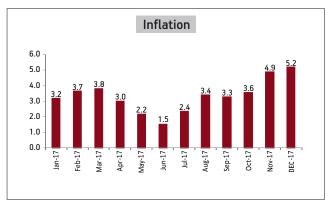

The key events which had an impact on the markets in the month were –

Domestic factors

- a) PSU Bank Recapitalization: Government allocated a total of INR 88100 crs, INR 80,000 crs through recapitalization bond and INR 8,100 crs as budgetary support to PSU banks under the bank recapitalization plan. Around 61 per cent of the money allocated has been provided to banks which are currently under Prompt Corrective Action to boost the Tier -I capital and help
- b) IMF projection of strong Indian economic growth: IMF in its January update of world economic updates has maintained that India will be the fastest growing economy growing at 7.4 per cent in 2018-19 and 7.8 per cent in 2019-20.
- c) Cut in Government borrowing: Government cut the additional borrowing in the current fiscal to Rs.20,000 Cr. from earlier notified Rs.50,000 Cr. on 27th December 2017. The decision was taken after assessing the revenue and expenditure patterns of the government.
- d) GST council rate cut: GST council on 18th January'18 cut rates on 29 products and 54 services at its 25th meeting and agreed to make the process of filing tax return simpler. The council also reaffirmed its decision to roll out e-way bills for inter - state movement of goods.
- e) Union Budget: On February 1st, 2018, the government has presented an inclusive growth oriented budget with a clear focus on rural, social & infrastructure spending. We believe that economic growth pick up will be boosted with the increasing spends towards the broader lower section of the society. Apart from the sentimentally negative stroke of LTCG, the equity markets post a short term knee jerk reaction will start focusing on corporate earnings growth and a bottom up stock picking strategy will work going forward for long term investors.

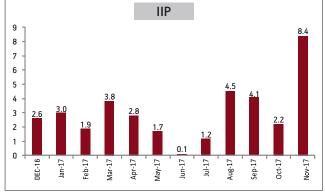

Domestic macro economic data.

Inflation (CPI) for December - 17 was recorded at 5.2 per cent against 4.9 per cent in November - 17. This was due to rising food inflation and fuel inflation.

On the economy front, IIP surged to 8.4 per cent in November - 17 vs 2.2 per cent in October - 17.

About The Fund Date of Inception: 12-Jun-07

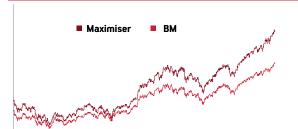

OBJECTIVE: To provide long term capital appreciation by actively managing a well-diversified equity portfolio of fundamentally strong blue chip companies. Further, the fund seeks to provide a cushion against the sudden volatility in the equities through some investments in short term money market instruments.

STRATEGY: To build and actively manage a well-diversified equity portfolio of value and growth driven stocks by following a research focused investment approach. While appreciating the high risk associated with equities, the fund would attempt to maximize the risk-return pay off for the long-term advantage of the policyholders. The fund will also explore the option of having exposure to quality mid cap stocks. The non-equity portion of the fund will be invested in good rated (P1/A1 & above) money market instruments and fixed deposits. The fund will also maintain a reasonable level of liquidity.
